Presentation on
DIGITAL SERVICES

For Pilgrimage Queue Management

Enhancing Devotion, Ensuring Safety, Optimizing Flow

About
Aatreya Infotech Systems

This presentation is designed to showcase Aatreya Infotech Systems' innovative solutions for pilgrimage queue management, addressing unique challenges and enhancing the devotee experience. It emphasizes efficiency, safety, and spiritual comfort through technology. Visual: A serene yet organized image of a pilgrimage site with subtle digital overlays indicating smooth flow or smart technology (e.g., people moving calmly in an orderly line, a temple entrance with digital signage)

Headline: Empowering Religious Institutions with Intelligent IT Solutions.

Key Message: "At Aatreya Infotech Systems, we are a forward-thinking technology solutions provider dedicated to empowering businesses and institu tions through innovative IT services and intelligent solu tions. With a deep understanding of diverse opera tional needs, we combine technical   expertise, creative problem-solving, and cutting-edge technologies to deliver impactful results for our clients."

Bullet Points:

* *Committed to excellence in specialized IT solutions.*
* *Bridging unique operational needs with advanced technology.*
* *Fostering efficiency, safety, and digital transformation for institutions.*
* *A trusted partner in navigating the evolving digital land scape.*

Visual: An image representing the blend of tradition and moder nity, perhaps a historical building with subtle digital ele ments, or a handshake signifying partnership.

Our Vision & Mission

A **Headline :** Your Full Potential in the Digital Landscape

B **Vision** : To be the trusted partner for organizations seeking to achieve their full potential in today's fast-evolving digital landscape.

C **Mission** : To bridge the gap between business needs and technology, providing innovative and intelligent IT services that drive growth, efficiency, and digital transformation for our clients.

D **Visual** : An aspirational image, perhaps a path leading to a bright future, or a compass pointing towards success.

Our Core Offerings (Services at a Glance)

Headline: Comprehensive IT Services & Customized Solutions

Key Service Categories :

Software Development : Custom applications, web development, mobile apps.

IT Management : Proactive management, infrastructure optimization.

Cloud Services : Cloud migration, infrastructure as a service (IaaS), platform as a service (PaaS).

Cybersecurity : Protecting systems, networks, and data from digital threats.

Access Card Details

Darshan Type ,Token Number , Devotee Name , Referrer Name , Designation,
Total Devotees , Paid Amount , Date & Time , QR Code (for verification/access)
Photo (applicant's captured image)
Unique Token ID generation.
Image capture and embed into token.
QR Code auto-generated for verification.
Tracks paid vs. free darshan count per token.
Shows designation and referrer details.

PROTOCOL ACCESS MANAGEMENT SYSTEMS

Issue Access Token Page

Purpose:
To verify a Ticket No. and display the associated Referrer + Devotee + Darshan details along with a photo, before issuing or printing the final Access Token Card.

Objective:
When a protocol access request includes multiple devotees (e.g., 2 devotees),
Loop through each devotee.
Generate a token per person.
Auto-open/print each token page individually.

PROTOCOL ACCESS MANAGEMENT SYSTEMS

Reports Page

From Date , To Date , Select Report Type Dropdown with report format options (see below).
DCR REPORTDaily
Collection ReportShows total entries,
ticket counts, and darshan type breakdowns per day.
ABSTRACT REPORT
High-level summaryGives a consolidated view of requests,
devotees, and revenue over a date range
CATEGORY WISE REPORT
Groups data by request categories (e.g., Staff, VIP, MLA, etc.)
Good for segment-wise analysis.
